

Sami Yusuf

Chair, Corporate Development - International & Mayo Clinic Labs

Sami Yusuf serves as Chair of Corporate Development for International where he is responsible for driving partnerships, strategic collaborations and strategic alliances by coordinating, negotiating, and executing strategic transactions in support of Mayo Clinic and its International business.

Sami has robust experience across leadership positions in research and development, alliance management, portfolio strategy, corporate strategy, and corporate development from small cap privately held companies to fortune 500 public companies. In addition to his extensive experience in the life science and pharmaceutical industry, he has held an adjunct faculty position and has experience in direct health care delivery. Sami has held various board membership positions in health care companies including in industry associations. Sami also serves on venture catalyst advisory boards.

Sami holds a BS in Microbiology and a BS in Molecular Genetics from UCLA, an MS in Biological Chemistry from Purdue University, a Pharm D from Creighton University, and an MBA from University of Michigan.

Our primary value

The needs
of the patient
come first
